

Manage eDashboards

Caution	You could affect the performance of the Avanti System and eDashboards if you do not follow closely the procedures for performing the administrative tasks described in this section. If you have any questions, consult your system administrator or contact the Avanti support team.
---------	---

Setting up eDashboards to Open Automatically

Set up eDashboards such that it opens automatically after logging on to the Avanti System. This is a personalized configuration. In other words, the Avanti System remembers this setup, and eDashboards opens automatically regardless of the computer the user employs to log on to the Avanti System. If a user without this configuration logs on with the same computer, eDashboards will not open automatically for that user.

To set up eDashboards to open automatically

1. Log on to the Avanti System.
2. On the **Tools** menu, point to **Setup**, point to **System**, and then click **User Maintenance**. The User Maintenance tab opens next to the eDashboards tab.
