

Contact Center - Transcription and Insights: Getting Started

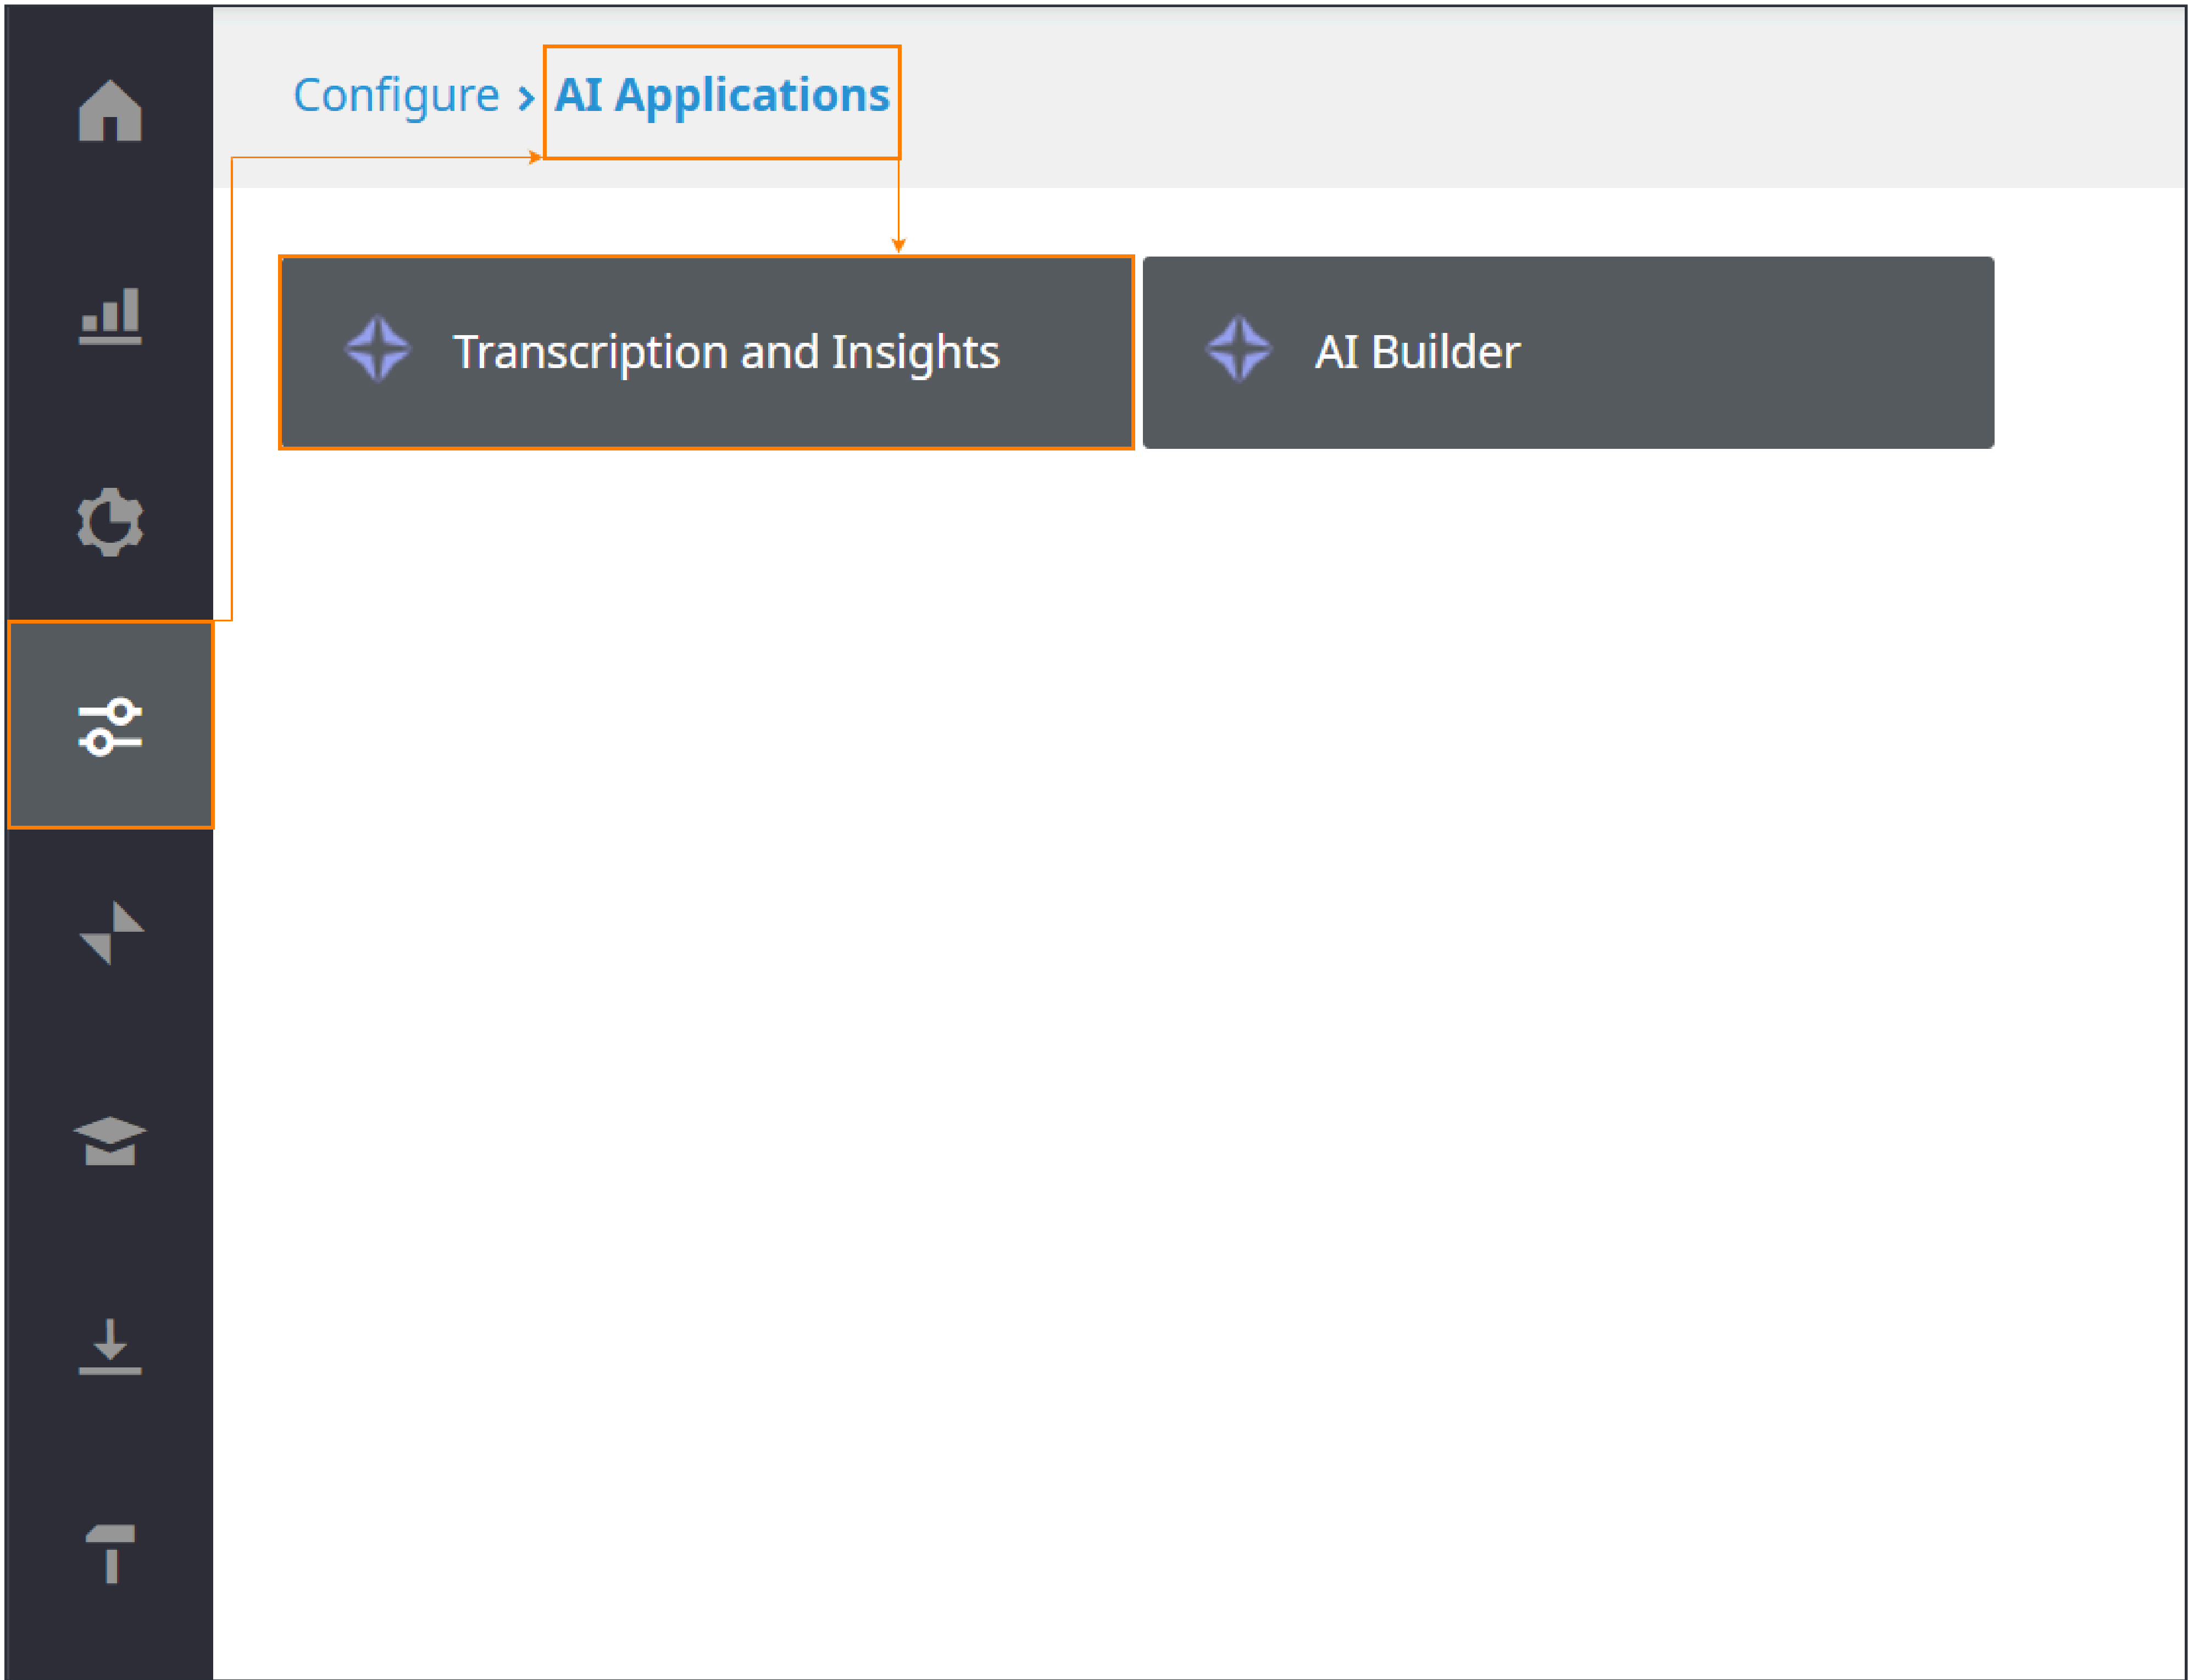

Important: if the options described in this article are not visible in your HostPilot or Contact Center Admin Portal, your account has not yet been migrated to the new AI products. Beginning in Q4 2025, we'll start transitioning customers with AI subscription to the new AI Standard and AI Advanced packages.

Using Contact Center's AI capabilities, you can manage call recording and voicemail message transcriptions, summarization, and redaction.

- **Transcriptions** – get a written version of a call recording or voicemail message and a sentiment analysis of the transcription
- **Summarization** – obtain a brief overview of the call recording or voicemail message transcription
- **Redactions** – obscure sensitive customer data out of your call recording or voicemail message transcriptions in order to safeguard your customers' privacy and comply with data privacy regulations

Accessing Transcription and Insights

Log on to Contact Center, and then navigate to *Configure > AI Applications > Transcription and Insights*.

The **Transcription and Insights** page appears, with the **Transcriptions** tab selected by default. If you have purchased an AI Subscription package, the tab will indicate which package.

Note: the AI Standard plan is automatically included for Elite users.

Pro	Elite

Notes:

- transcription and summary generation of **inbound** and **outbound** calls are available in the following languages:
 - Deutsch (Deutschland) = **de-DE**
 - English (Australia) = **en-AU**
 - English (UK) = **en-GB**
 - English (US) = **en-US**
 - Español (Latinoamérica) = **es-ES**
 - Français (Canada) = **fr-CA**
 - Italiano (Italia) = **it-IT**
 - Nederlands (Nederland) = **nl-NL**
- detailed insights (topics extractions, sentiment analysis, and redaction) are available for English calls (all English dialects) only.
